EasyWash

The ideal model for service washes
and small car wash businesses

WashTec

For service washes and
small car wash businesses

EasyWash
Design: Basic

- Extremely compact external dimensions, ideal for small halls. Large internal dimensions to allow for wide vehicles
- High-quality washing and drying at a low initial investment and low operating costs.
- Intensive wash with FlexControl: The side washers adjust their angle to ideally suit every vehicle shape
- Intensive drying with four fans: following the vehicle's contours thanks to wash data from the memory function

Modern car wash technology,
perfected down to the last detail

QUALITY AT A REASONABLE PRICE

The high quality materials and workmanship ensure that the system operates continuously and reliably at low maintenance costs.

PROFESSIONAL CAR WASHING

EasyWash provides all of the functionality that is required to clean vehicles: Pre-wash, washing with gentle washing material and drying.

CONTROL

Precise control – contour-tracking washing: The ideal contact of the washing brushes with the vehicle is continuously monitored by microprocessors.

CLEANING AND MAINTENANCE MATERIALS

The WashTec technology integrates chemicals into the cleaning process in a highly economical way while achieving top washing results.

SOFTECS® PUR

The gentle washing material washes thoroughly without leaving marks.

EXTEND EQUIPMENT OPTIONS

Extend the system's performance range with options such as the underbody wash.

Technical advantages that
benefit your business

EASYWASH

Perfect dimensions – maximum business

External dimensions:
• Machine heights: 2810 mm to 3710 mm
• Machine width 3500 mm
• Machine depth 1750 mm

Vehicle dimensions:
• Washing heights from 2300 mm, 2600 mm to 2900 mm
• Maximum vehicle width 2480 mm
• Entry lane 2050 mm

TRAFFIC LIGHTS

The traffic light at the entrance helps car drivers to position the vehicle quickly and precisely. It also indicates the end of the wash and therefore speeds up the entire washing process for waiting customers.

PRE-WASH

Top washing results: A foam pre-wash loosens dirt particles, making it easier to wash off afterwards.

HIGH-PRESSURE PRE-WASH

High-pressure rinsing is advisable after coarse dirt particles have been loosened. EasyWash comes with various high-pressure spraying systems.

DESIGN OPTIONS EASYWASH

1 **Design:** Plus

2 **Design:** Basic

ART COLLECTION

3 **Design:** CarWash

4 **Design:** Première

5 **Design:** EasyWash & Shine

6 **Design:** UK

Multiple design options available. Customised designs are available on request. We would be delighted to help you create your own.

SIDE WASHERS

By automatically inclining, the side washers adapt to every vehicle shape and ensure a completely clean wash all around!

WHEEL CLEANING

Wheel washing brushes are designed specifically for cleaning wheel rims. Optionally also under high pressure.
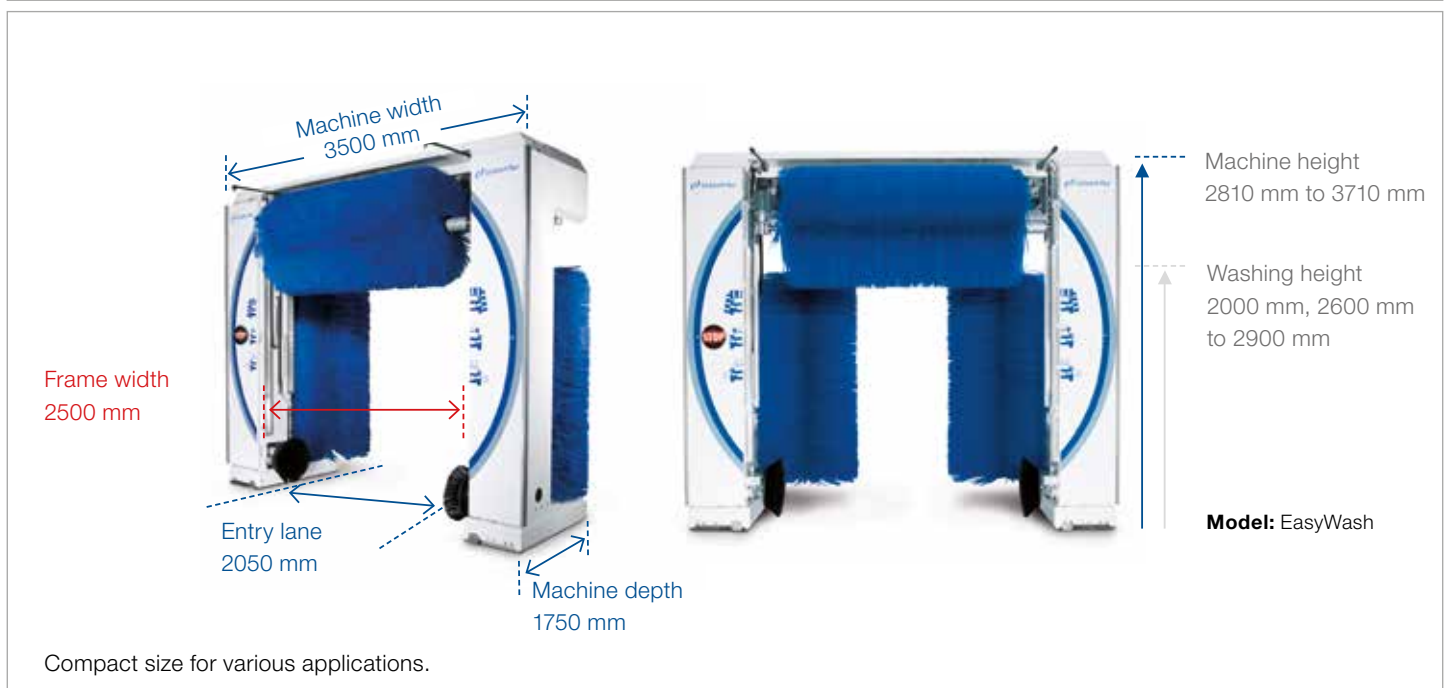

DRYING

Optimum air flow – clean drying: The dryer system's construction effectively forces drops of water on the roof and sides downwards delivering a completely dry vehicle.

Options for extending
the performance range

PERFECT DIMENSIONS – MAXIMUM BUSINESS

Machine width 3500 mm

Machine height 2810 mm to 3710 mm

Washing height 2000 mm, 2600 mm to 2900 mm

Frame width 2500 mm

Entry lane 2050 mm

Machine depth 1750 mm

Model: EasyWash

Compact size for various applications.

ADDITIONAL WAXING PROGRAMMES

Car care and paint preservation help protect vehicles and their value. Preservation is a popular option in commercial car washes and a key to increasing turnover and profit. EasyWash can optionally be equipped with a waxing or foam waxing arch.

ADDITIONAL BUSINESS – UNDERBODY WASH

The underbody wash is a popular service in winter and spring. The segment control allows short vehicles to be washed accurately and therefore contributes to the economical operation of the system.
